

UDEMBA OGECHUKWU ARNOLD

Backend Developer

+2348169431690 | udembao429@gmail.com | Imo State, Nigeria

CAREER OBJECTIVE

As a passionate and dedicated backend developer with a strong foundation in Node.js, Express.js, and MongoDB, I aim to leverage my skills in building efficient, scalable, and secure web apps. I am committed to continuous learning, particularly in microservices architecture, and eager to contribute to a dynamic team in a challenging development role. With a background in affiliate marketing and customer relations, I bring a versatile skill set and a collaborative mindset to the workplace, seeking opportunities to grow within a forward-thinking tech company.

EXPERIENCE

Affiliate Marketer | Expertnaire

December 2022 - April 2023

- Promoted digital products and services through various online platforms, including social media and email marketing.
- Generated leads and sales by utilizing SEO, content marketing, and paid advertisements.
- Developed marketing strategies to increase brand awareness and engagement.
- Collaborated with the Expertnaire team to optimize campaigns for maximum conversion.
- Analyzed performance metrics to adjust strategies and improve marketing effectiveness.

Loan Collection Representative | Okash

June 2022- October 2022

- Managed customer accounts, ensuring timely reminders for loan repayments via calls and messages.
- Effectively communicated loan terms and repayment options to customers, improving collection rates.
- Monitored overdue loans and provided support to customers in resolving payment issues.
- Utilized CRM tools to track customer interactions and ensure accurate loan records.
- Collaborated with team members to achieve monthly collection targets and reduce outstanding balances.

PROJECTS

Booking System (Completed)

Description: A system that allows users to book tours on a website.

Technologies: Node.js, Express.js, MongoDB

Features:

Implemented CRUD operations for managing bookings.

Integrated user authentication with JWT for secure access.

Event Management System (In Progress)

Description: A system for users to book tickets for events, including support for recurring events.

Technologies: Node.js, Express.js, MongoDB

Features:

Developing functionality for event creation, ticket booking, and recurring event support.

Adding user management and payment gateway integration.

Exploring micro-services architecture for better scalability.

EDUCATION

BSc in Petroleum Engineering – Federal University of Technology Owerri (Ongoing)	2024
--	------

PROFESSIONAL CERTIFICATIONS

Online Certificate – The Complete Web Development Bootcamp 2024 by Angela Yu (Udemy)	2024
--	------

SKILLS

- Languages: JavaScript
- Frameworks: Node.js, Express.js
- Databases: MongoDB, MySQL
- RESTful API Design, Microservices

TOOLS

- Git/GitHub
- Postman
- Visual Studio Code
- Docker (exploring)

Additional Information

Currently exploring microservices architecture.

Actively participating in the #100DaysOfCode challenge.
