EDUCATION

Federal University of Technology, Owerri (FUTO)

Owerri, Imo State

Bachelor of Engineering in Petroleum Engineering

Nov. 2018 – Dec. 2024

EXPERIENCE

Backend Engineer Intern

July.2026 – Present

Muno

Remote

- Developed backend services for a Canadian immigration and visa management platform using Node.js, Express.js, TypeScript, and TSOA.
- Implemented secure authentication and authorization workflows using JWT to protect user accounts and API endpoints.
- Integrated Stripe and Paystack payment gateways to support secure payment processing and transaction workflows.
- Built and documented RESTful APIs with TSOA and Swagger while collaborating with cross-functional teams to deliver scalable backend solutions.

Backend Engineer Intern

April. 2025 – September 2025

SQWADS

Lagos, Nigeria

- Led the backend engineering intern team in designing, developing, and optimizing RESTful APIs using Node.js, Express.js, and MongoDB, ensuring high performance and maintainability.
- Coordinated backend development tasks, conducted code reviews, and collaborated with cross-functional teams to deliver project milestones.
- Collaborated with the development team to design and refactor backend architecture, improving scalability, maintainability, and overall system performance.

Freelance Backend Engineer

September. 2024 – Present

Upwork

Remote

- Developed and deployed scalable RESTful APIs using Node.js, Express.js and MongoDB, ensuring high performance and maintainability.
- Designed and implemented secure authentication and authorization systems using JWT and bcrypt, improving data protection.

Freelance DevOps Engineer

December.2024 – Present

Upwork

Remote

- Deployed and maintained backend applications on cloud infrastructure using AWS and Docker.
- Configured Nginx reverse proxies, SSL certificates, and process management to improve application reliability and availability.
- Automated deployment workflows and managed server environments, reducing manual deployment effort.

PROJECTS

[9jaSchoolsHub](#) | Node.js, Express.js, MongoDB, JWT, Git, Postman, Render

- Developed and deployed a RESTful API for managing Nigerian university data, enabling CRUD operations for university records.
- Designed and implemented secure API access using API key authentication, with rate limiting, Helmet, and data sanitization to improve application security.
- Tested and documented API endpoints with Postman and deployed the application on Render

TECHNICAL SKILLS

Languages: Javascript, Python, Typescript

Frameworks: Node.js, Express.js, Nest.js

Developer Tools: Git, Postman, Render, VS Code, GitHub, Docker, Nginx, linux

Database: MongoDB, PostgreSQL
